

Welcome to Kendriya Vidyalaya Rayagada. I wish all the parents and the students best of luck in all their future endeavours. I personally feel the future of the Nation is in the hands of the younger generation. India has got maximum number of its population in the age group below 30 years. The great, Dr. A P J Abdul Kalam always says that the country belongs to younger people. He wanted them to dream big and realize their dreams. According to him small aim is a crime. Armed with Technology and powered by Economic growth, it is their moral responsibility to see that they aim for something great and contribute their best to the country.

There are a number of social evils in the society today. It is important that each and every citizen of the country to recognize these evils and also realize the dangers that lie ahead. There is need to repair this country and the country men. You cannot expect an outsider to come and do this for us. The onus is on each one of us. Only Indians can make India a wonderful place to live.

Dear children, come on, realize your potential. The country is calling you and is looking forward to your contribution. This country has got everything for the need of the people but not for the greed of the people. We have got enough resources to make it the number one country in the world. It is our responsibility to see that these resources do not go into the hands of few rich and greedy people making majority to starve.

The need of the hour is honesty and self discipline. Inculcate values in yourselves and become a role model for the next generation. Make up your mind that it is the time for you to act to make a difference. Recall the five most important values in life.

**Love, Peace, Truth, Non-Violence and Righteous Conduct.**

**The country is calling you!!!!**

**My dear children wake up!!!!**
